op.

In Kazincbarcika (Hungarian People's Republic) a town built in the last 15 years, having 35 000 inhabitants; there is one of the greatest chemical plants of the country, named BVK. At this plant there are produced nitrogen fertilizers as well as organic and inorganic chemicals, industrial gases in excellent quality on the highest level. A significant part of its products is exported. We wish to introduce to you the makes of the **Borsodi Vegyi Kombinát** which represent the prominent products of the Hungary's chemical industry.
